### **Lisa Wadsworth, RDH Transitions into Advisory Role at 3<sup>rd</sup> Era Dentistry**

**Doylestown, PA – September 28, 2015** – 3<sup>rd</sup> Era Dentistry, a company founded by Dr. Charles Whitney, the nation's leading medical advocate for improved collaboration between dentistry and medicine, recently announced that its director of operations, Lisa C. Wadsworth, RDH has left full-time employment, but will be remaining as an advisory board member.

According to Dr. Whitney, "Lisa was very valuable in helping us develop the 'Oral-Systemic Team Empowerment Program.' I'm very happy that she will remain in an advisory role that will include being a periodic guest on our CE accredited podcasts and webinars. I wish her all the best in the latest chapter of her career."

Ms. Wadsworth recently accepted a position as the director of hygiene for Blackford Dental Management, a dental service organization that operates approximately 30 practices in Pennsylvania, New Jersey and Georgia.

"My time spent with Dr. Whitney was an incredible learning experience that helped me bridge the gap between my periodontal therapy background and its positive impact on systemic health," explained Wadsworth. "I now have the opportunity to apply my clinical hygiene experience and what I learned from Dr. Whitney to help Blackford Dental Management fulfill its mission of providing the highest level of patient care."

### **About 3rd Era Dentistry**

Based in Doylestown, PA, 3rd Era Dentistry is a division of 3rd Era Health, which was founded by practicing physician and healthcare industry thought leader Charles Whitney MD, to be a catalyst for integrating patient care across all healthcare disciplines. 3rd Era Dentistry is specifically-focused on the links between oral disease and overall health by encouraging increased collaboration between dentistry and medicine. The ultimate goal of 3rd Era Dentistry is to create optimal health and prevent systemic diseases that originate from or are exacerbated by periodontal or endodontic infections. These preventable or manageable diseases include heart disease, stroke, pregnancy complications, arthritis, diabetes and dementia.
